²TVPI – is the "Total Value Paid In" ratio and is, according to the Institutional Limited Partners Association (ILPA) perhaps the best available measure of performance before the end of a (closed-ended) fund's life. TVPI is the total estimated value of the fund's investments, both distributions received plus the value of the remaining investments in the fund, divided by the amount of capital paid into the fund to date. For the purposes of calculating TVPI Spire capital includes the value of any Foreign Income Tax Offsets in the value of distributions received. This ratio has other names, including Multiple of Investment Capital (MOIC) and the Return on Invested Capital (ROIC).
